CRUISE2 Product Introduction

On the basis of SEUIC star product "CRUISE1P", SEUIC launched a new generation of equipment, CRUSIE2, which inherits the excellent genes of the first generation of CRUISE and improves its performance, reliability and operation experience. Provide better operation experience for front-line employees and bring more significant efficiency improvement.

Inheritance of classics, A new upgrade

Continue the comfortable grip and one-handed convenient operation experience of first generation, and on this basis, start a comprehensive upgrade, bringing a qualitative leap.

Double performance

Experience optimization

More accurate

Durability boost

Typical application scenarios

Retail e-commerce

Store Management/Warehouse Management

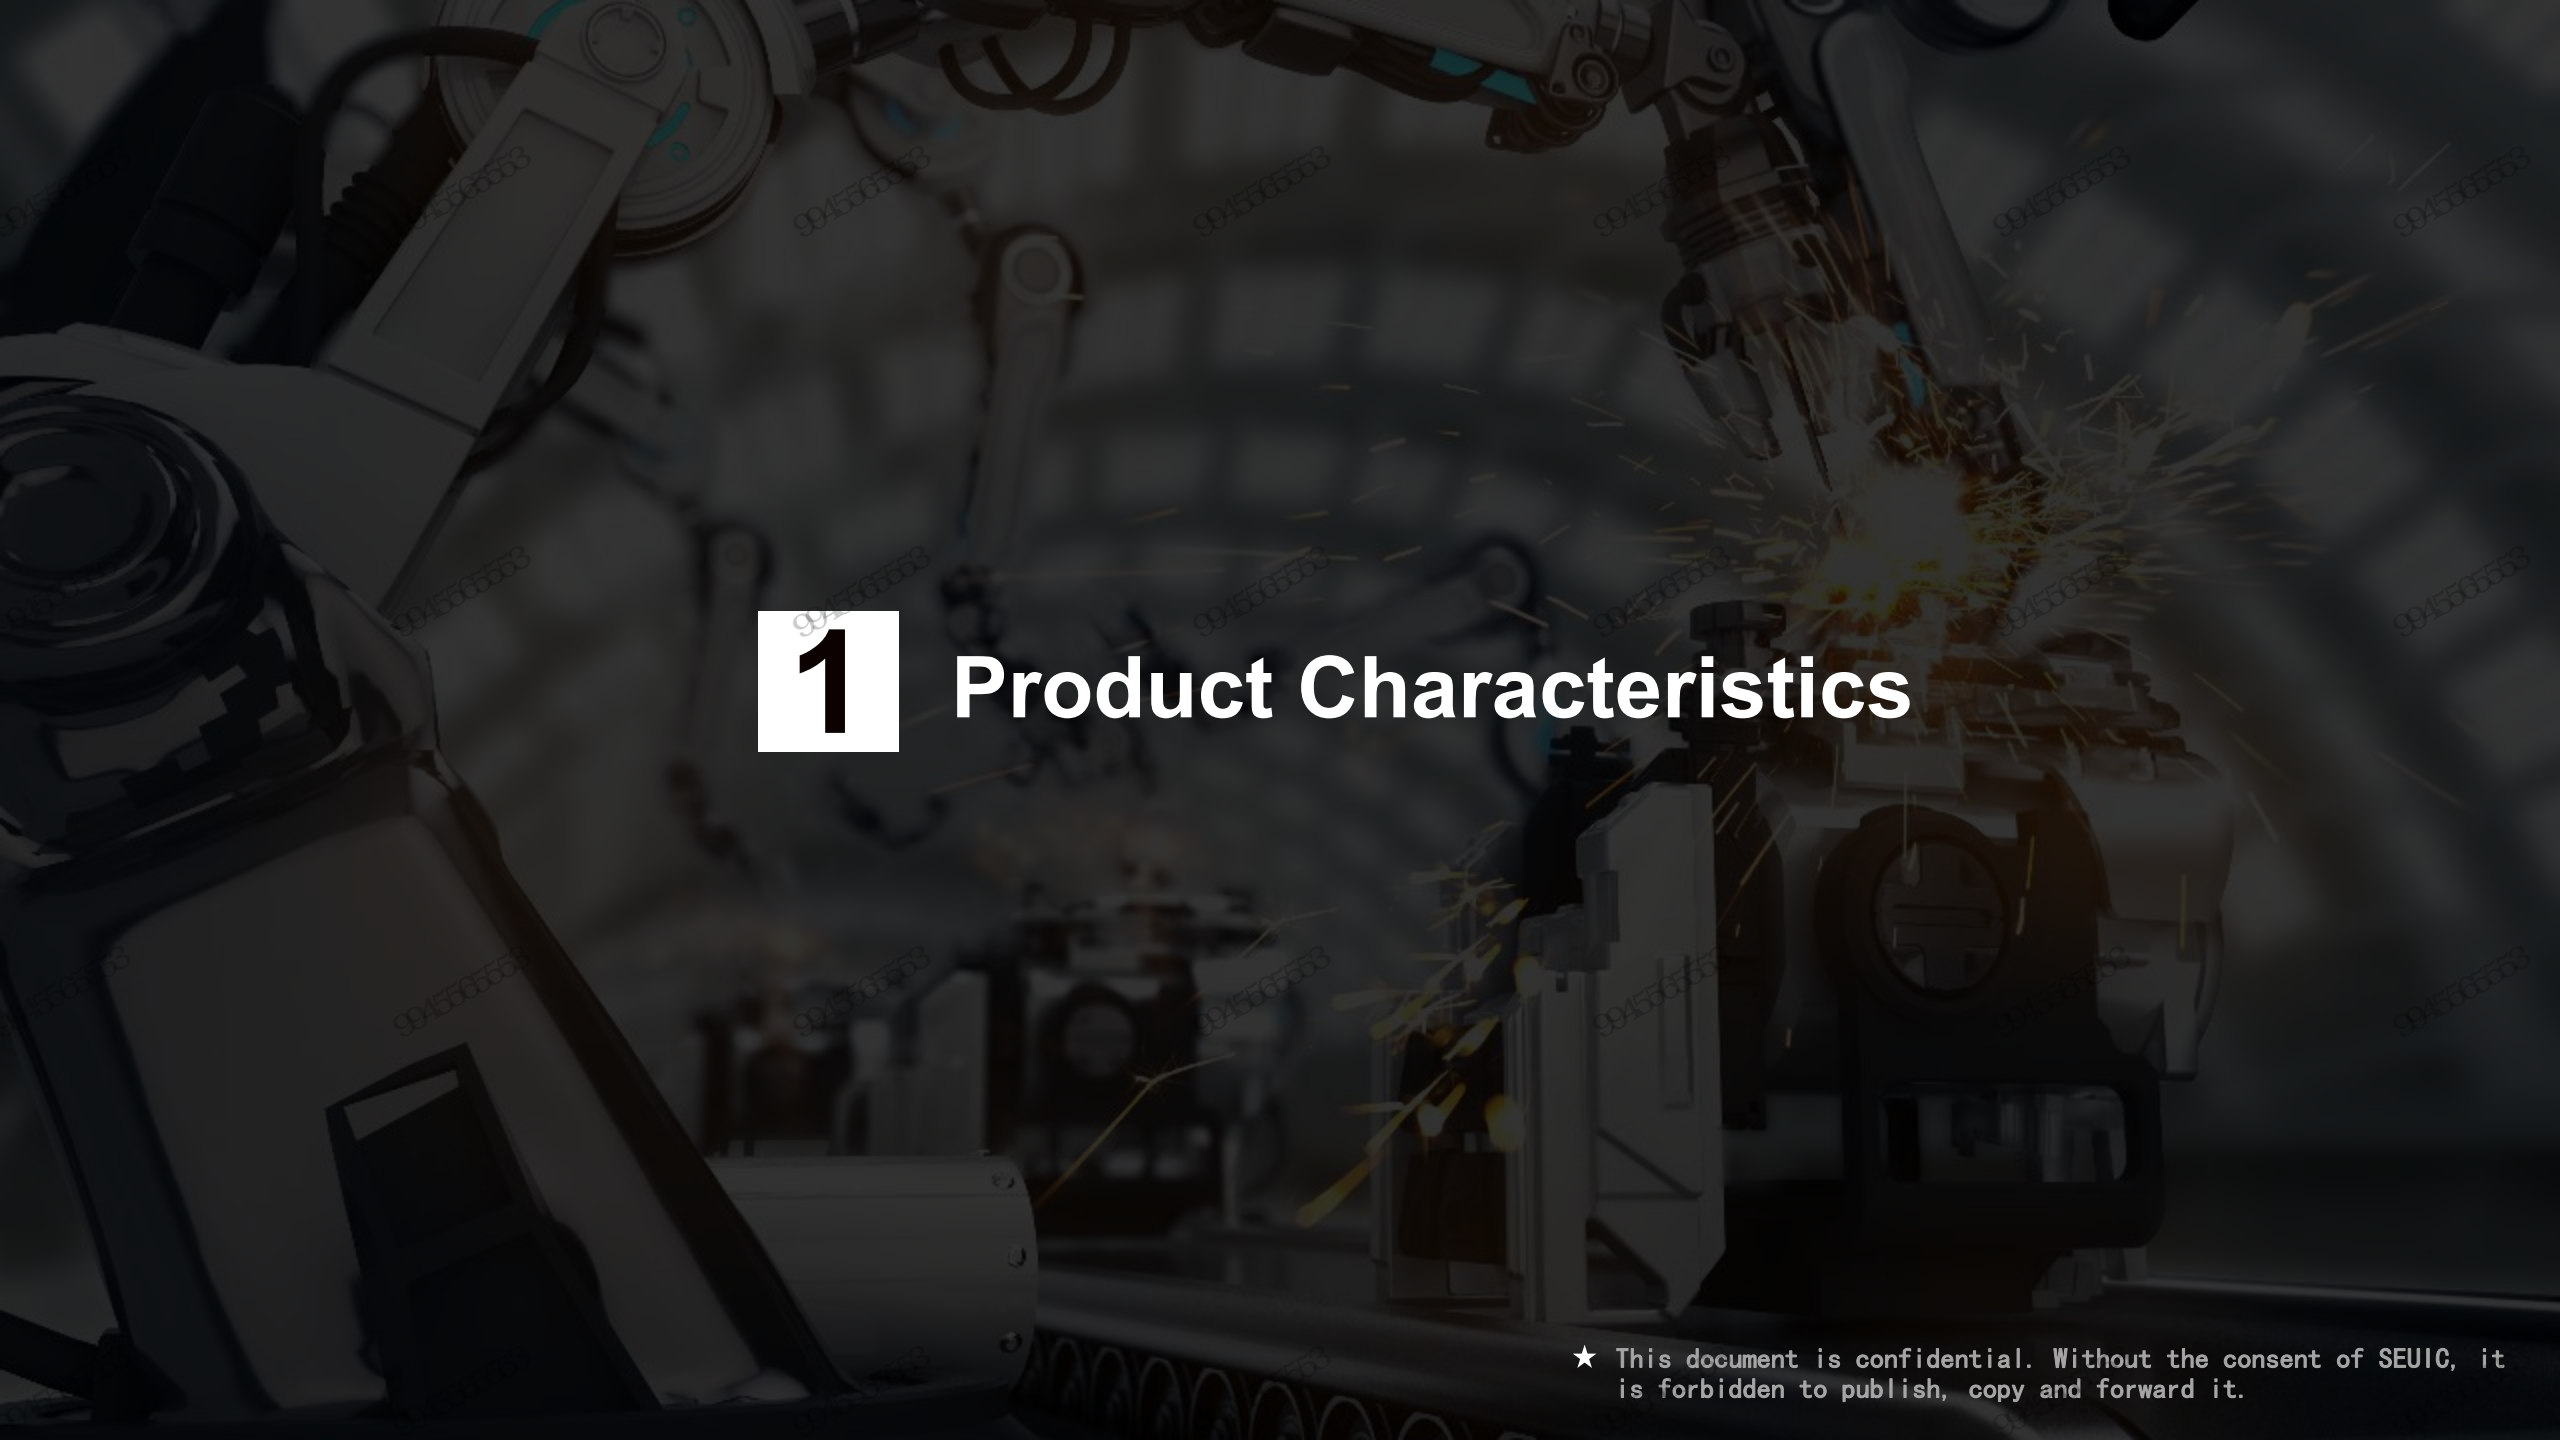

Manufacturing

MES application/production line reporting/spot inspection

Field mobility

Patrol/Ticketing/Government Applications

A dark, industrial background featuring a robotic arm in the process of welding a metal component. Bright sparks are visible at the point of contact between the welding torch and the metal. The scene is dimly lit, emphasizing the bright light from the welding process.

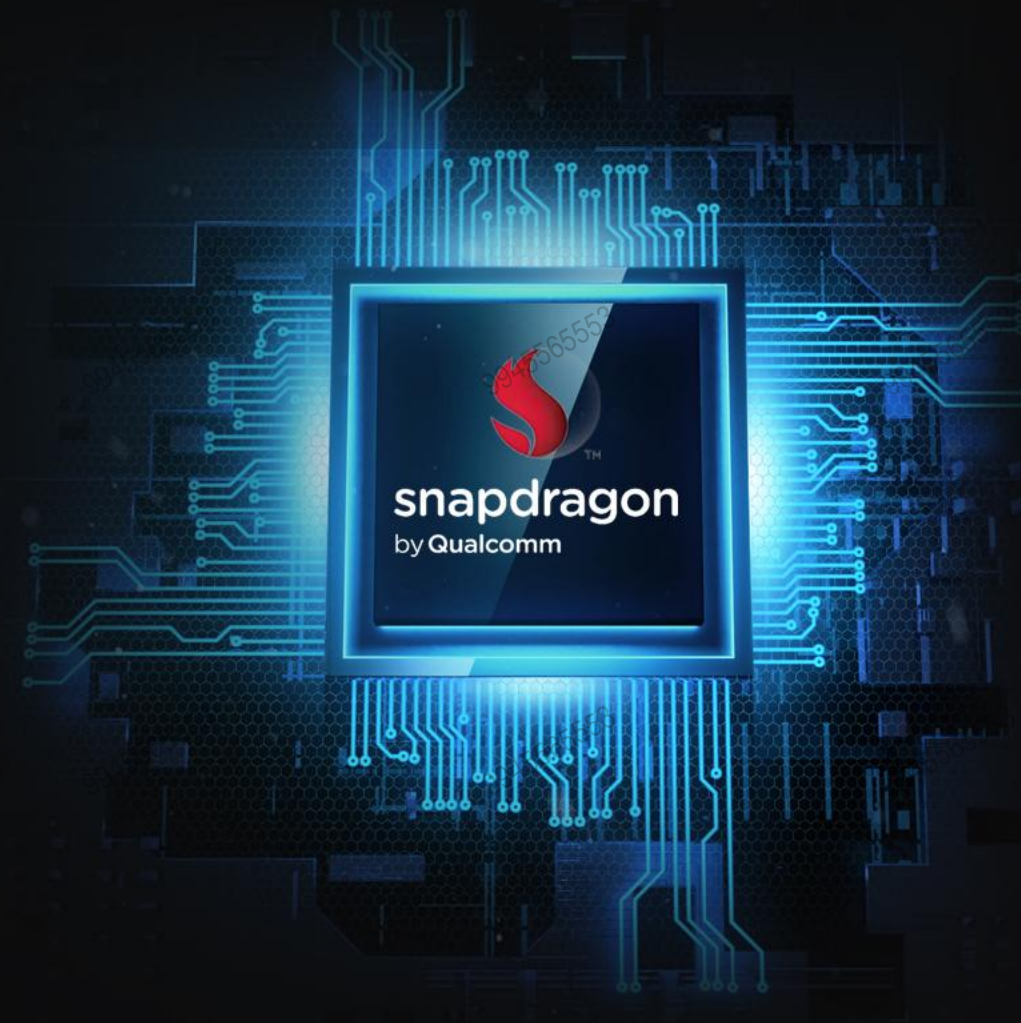

1 Product Characteristics

★ This document is confidential. Without the consent of SEUIC, it is forbidden to publish, copy and forward it.

Completely upgraded platform. Smooth running, No matter what the occasion is

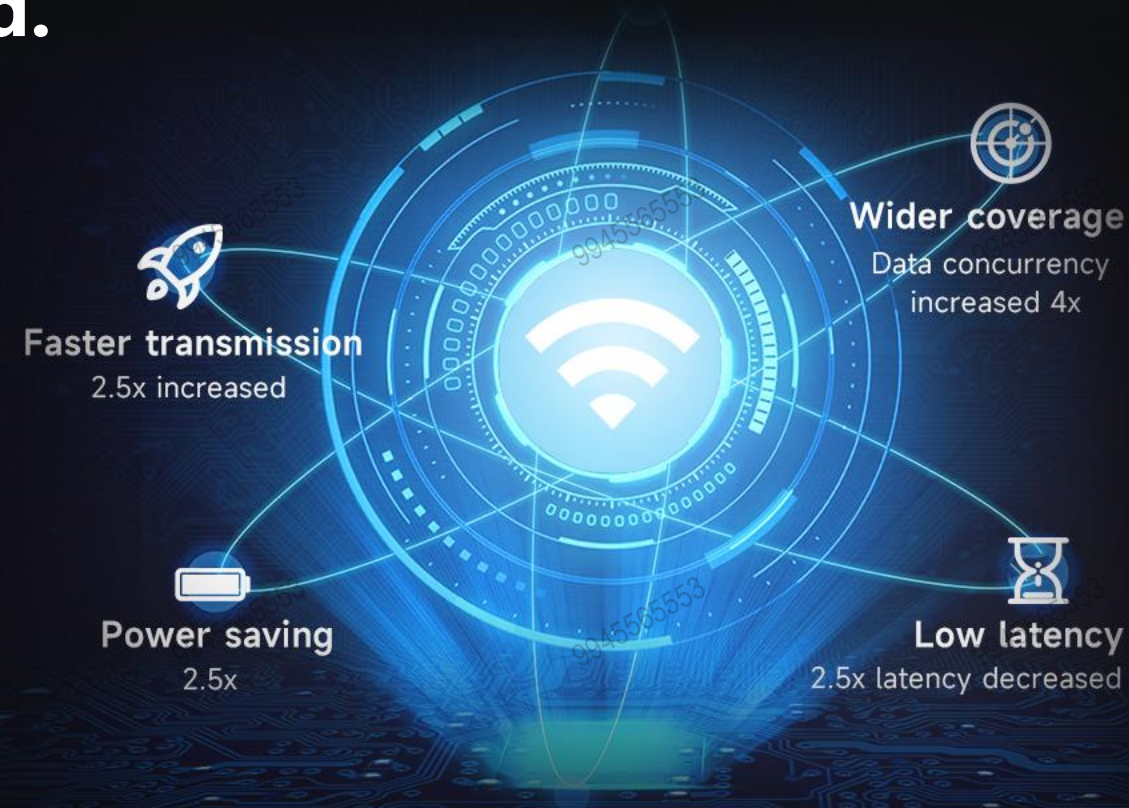

Strong core and performance

- Qualcomm 662 platform octa core 2.0 GHz processor, running performance is 100% higher than the first generation of CRUISE, so that a variety of applications can be used smoothly;
- AI computing power support, dynamic performance automatic scheduling, APP application processing capacity, OCR recognition and other applications response and processing speed increased by 30%;
- Android 11, and further enhance data security, user privacy is better protected;

Fast Wi-Fi transmission, Use cutting-edge technology to boost uploading and downloading speed.

-
- Leading Wi-Fi 6 ready technology, compared with the first generation of CRUISE, has improved significantly, achieving more stable connection and longer transmission distance as a whole. Even in large warehouses with dense three-dimensional shelves, it can smoothly connected to ensure real-time data transmission.

Optimize the appearance design Comfortable feel, a palm can be held

- Continue the body width of first generation of CRUISE, optimize and upgrade the appearance, support one-handed holding and operation;
- Under the condition of ensuring the grip feeling, the screen is upgraded to a 5.5-inch full screen, which can be seen indoors and outdoors in strong light. The screen is waterproof, oil-proof, dirt-proof and fingerprint-proof, and is more sensitive to use.

Adapted image and text recognition APP

Accurate identification of image data, can replace manual input

-
- Support accurate recognition of numbers and letters
 - Support the customization of templates and identify the data in special customization scenarios
 - It has been successfully applied in manufacturing, retail, logistics, finance and other industries.

Multiple management tools, Get started with the equipment quickly and use it with free of worry

Better experience

More accurate 

Grinding key technologies, Read accurately and quickly, your good partner

- Advanced scanning technology, almost all kinds of bar codes can be scanned successfully at one time, and minimum support 3mil bar code recognition
- It can also have the speed and accuracy of static scanning in the state of mobile status.
- Support accurate and fast reading of two-dimensional codes such as DPM code, high density, damaged, distortion, stain, wrinkle and screen

More accurate 

Positioning is more accurate
The accuracy is improved to < 3 meters,
and the time for finding the way is
shortened again.

-
- The L1 + L5 dual-frequency dual-channel GPS positioning technology is adopted, the positioning is more accurate, the positioning between dense buildings is improved by nearly 1 meter, not only the accuracy is higher, but also the zero latency is realized, which can be effectively applied in the path planning application

The positioning accuracy is
improved by nearly 1 meter.

**It has a good endurance.
5000mAh strong power, 1-2 shifts work
can be fulfillment**

Large capacity removable high quality battery

- 5000mAh/6000mAh (optional), up to 14 hours of continuous use
- The battery can be replaced quickly without shutdown, and the working process is uninterrupted, which improves the efficiency of the shift.
- It has its own electricity indicator, which can automatically report battery management data, making it easier to manage.

Charging saves time and worry

- Support 18W fast charging, fully charged in 2 hours

Use longer 

**It has its own industrial genes.
The fuselage is specially reinforced, so
there is no need to worry about any use.**

-
- Re-reinforced body, high-end industrial quality, easy to use in harsh industrial environment

IP67

1.5m drop

★ This document is confidential. Without the consent of SEUIC, it is forbidden to publish, copy and forward it.

Configuration

Item	Parameter
CPU	QUALCOMM Octa core 2.0GHz
OS	Android11
RAM+ROM	4GB+64GB, Compatible with 6GB+64GB/8GB+128GB
Screen	5.5"
Battery	5000mAh(Standard)/6000mAh(Optional)
Protection	IP67 1.5mDrop
Camera	1300W Rea+500W Front Phase focus
Scanner	1/2 dimensional scanner
WLAN	5G/2.4G Dual frequency WIFI
WWAN	Global : 4G full netcom,7 modes 22 bands North American: 4 modes 22 bands
Positioning	L1.L5 Dual band GPS
NFC	Support
Fingerprint	Support

2 Accessory

★ This document is confidential. Without the consent of SEUIC, it is forbidden to publish, copy and forward it.

Standard accessories

Power adapter
Other areas need order accordingly

USB cable

Optional accessories

Protect case

Pistol Grip

Single device charging cradle

**Five-slot device
charging cradle**

4 batteries charger
